

Being a supporter and customer of an independant ISP, I would like to add my name as a petitioner against the motion of de-regulating ISP's. Having dealt with the bureaucracy of the large ISP providers (both ATT and SBC in S. Ca) I switched to an independant ISP because they can provide much beter and timely service. de-regulation of this industry puts the independant ISP's at risk, and us the consumer, at the mercy of the large Internet monopolys.
